To Whom It May Concern

Re: Generous Designer Shoe Donation

ORT South Africa together with Fasset initiated this year the **CAT Work Readiness** Programme. The project targets 100 unemployed finance graduates and aims to train them in a 5 week Work Readiness course, preparing them with skills, knowledge and attitudes for employment. The project aims to place at least 70% of these graduates into finance position in the finance industry.

Most of the students that attend the ORT skills programmes have worked hard to achieve their qualifications so far in life. Many are intellectual and positive and need only opportunities to succeed. The greatest gift we could give these students is the opportunities to support their families and empower themselves with employment. Many come from already stretched households and try their best to dress for interviews which in some cases is with top corporate accounting firms in South Africa.

The generous shoe donation which has been provided has given students more confidence for their interviews and hope for good things in the future

It is evident in the photos that the students are ecstatic with shoes and shoes appeal to every woman.

Thank you

Tracy Mayhew
